

METHOD AND APPARATUS FOR TESTING  
BATTERIES ON A GOLF CAR

ABSTRACT

A battery management system used for monitoring battery pack characteristics for electric or hybrid vehicles. The battery management system includes a processing unit which is easily connected to a battery pack of a vehicle for testing the battery pack according to the test method of the present invention. The battery management system tests a battery pack and records, stores and analyzes test data. The battery management system may also transfer data to a computer unit. The computer unit can share data and analysis on a network or the Internet.
